Hazardous Weather

Today

Weather Forecast Office
Lubbock, TX

Storms possible with highs in the 70s.

Issued May 29, 2019 5:49 AM CDT

f t NWSLubbock

weather.gov/lub

Today will be cooler with highs in the 70s. Thunderstorms will be possible across the region. Some storms, mainly across the southern Rolling Plains, could be strong to severe.

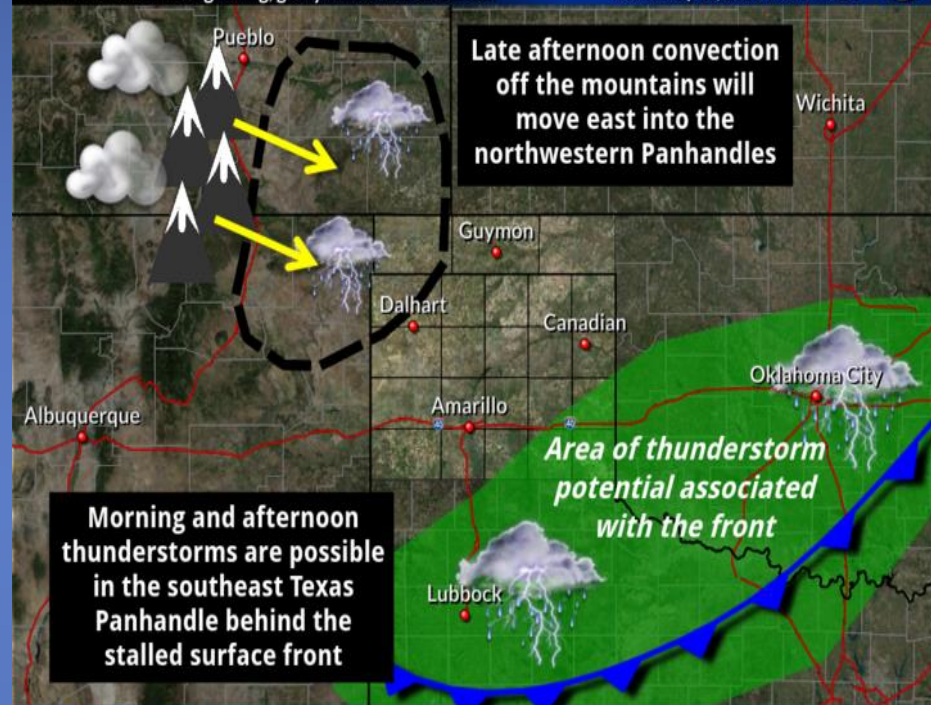

Wednesday's Thunderstorm Potential

Weather Forecast Office
Amarillo, TX

Main hazards will be lightning, gusty winds and small hail

Issued May 28, 2019 3:48 PM CDT

f t NWSAmarillo

weather.gov/ama

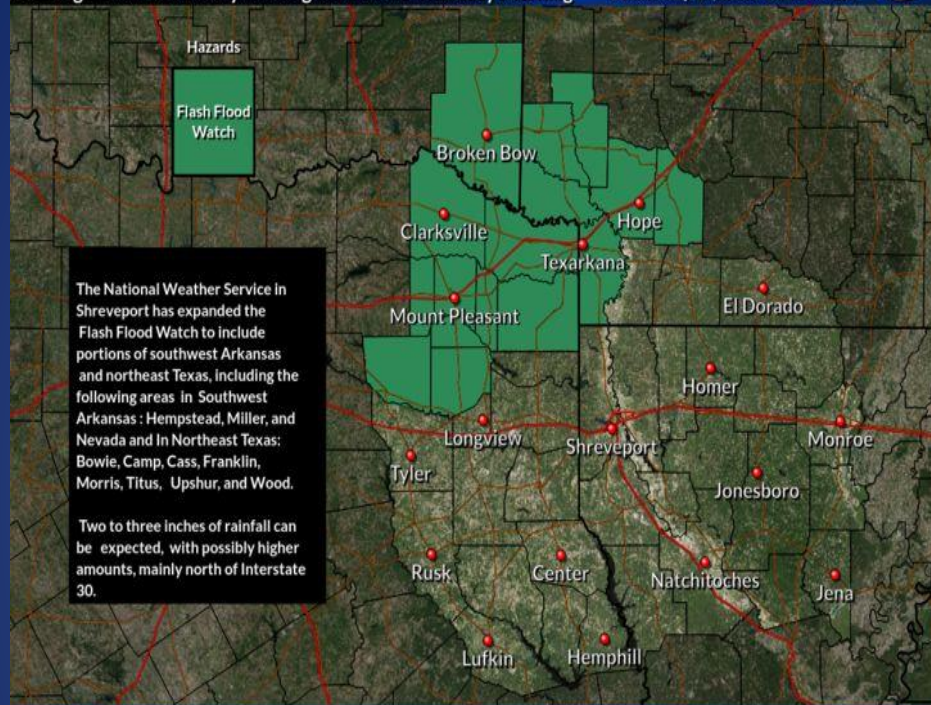

Showers and storms are expected to return on Wednesday. The southeast is expected for the earlier part of the day, and the northwest is expected for the later part day.

Hazardous Weather

Flash Flood Watch will be in effect Wednesday Night

Starting 7 PM Wednesday Evening until 7 AM Thursday Morning

Weather Forecast Office
Shreveport, LA
Issued May 29, 2019 3:31 AM CDT

f t y NWSShreveport

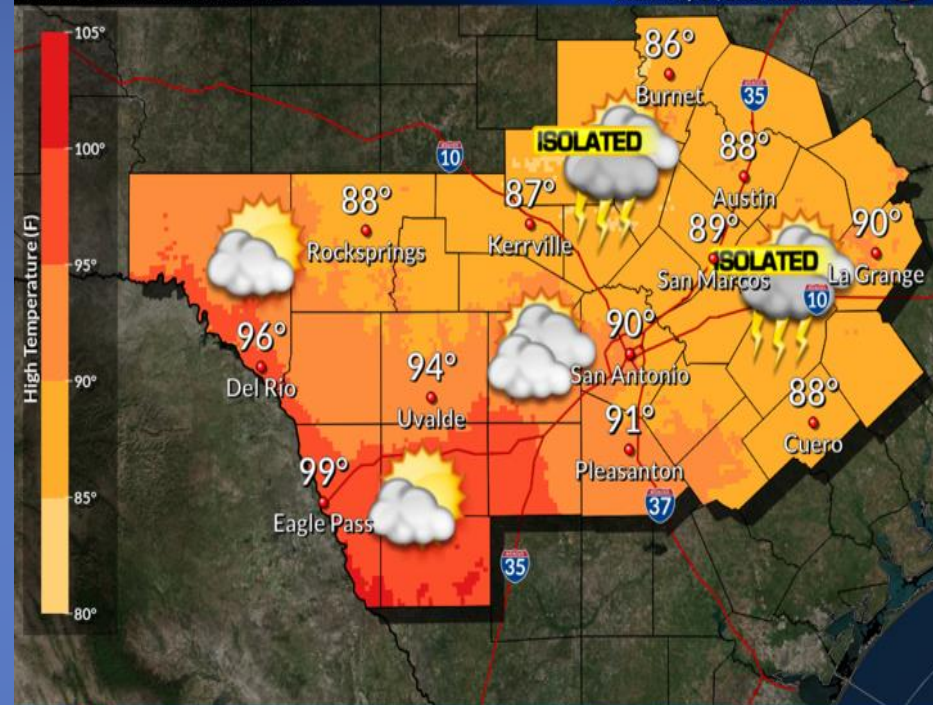

weather.gov/shv

Thunderstorms will bring heavy rainfall to portions of the region Wednesday evening through the overnight hours, which may lead to flash flooding as the ground remains fairly saturated from previous heavy rainfalls.

Today: Partly to Mostly Cloudy...Warm West

Isolated Showers and Storms East

Weather Forecast Office
Austin/San Antonio, TX
Issued May 29, 2019 4:33 AM CDT

f t y NWSSanAntonio

weather.gov/ewx

Mostly cloudy, warm, and humid conditions are expected again today across central and eastern areas, with breezy southeast winds and high temperatures in the low to mid 90s. There is also a slight chance for isolated showers and perhaps a thunderstorm. Better chances for showers and storms across northern areas will come late this evening as a weak cold front enters the region. Along the Rio Grande, partly cloudy and warm conditions are forecast today, with high temperatures in the upper 90s.

Hazardous Weather

Severe Weather Possible Today

Weather Forecast Office
San Angelo, TX
Issued May 29, 2019 3:44 AM CDT

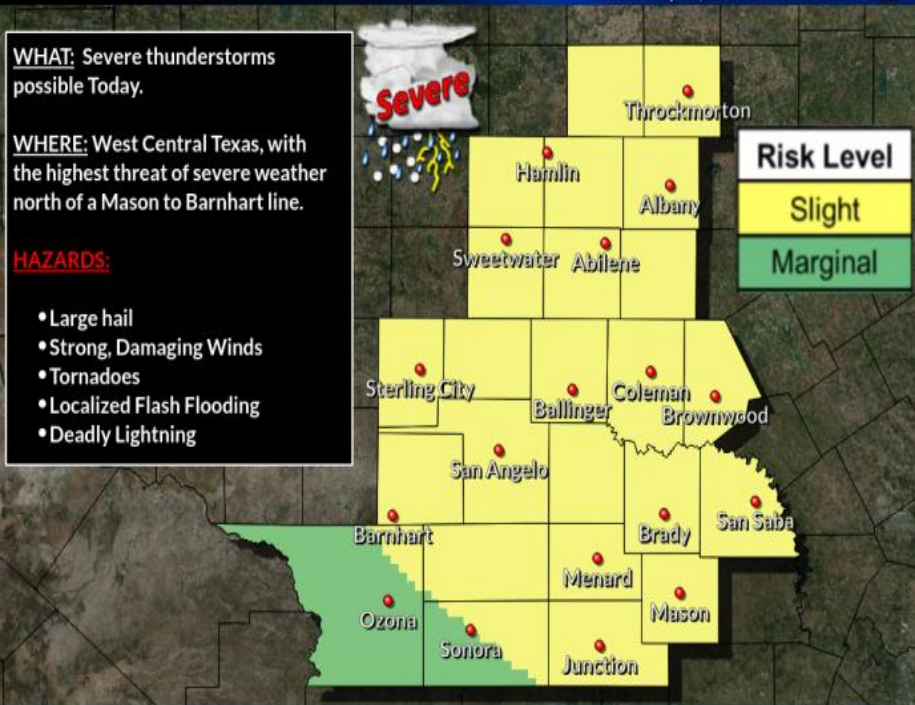

WHAT: Severe thunderstorms possible Today.

WHERE: West Central Texas, with the highest threat of severe weather north of a Mason to Barnhart line.

HAZARDS:

- Large hail
- Strong, Damaging Winds
- Tornadoes
- Localized Flash Flooding
- Deadly Lightning

f t y NWSSanAngelo

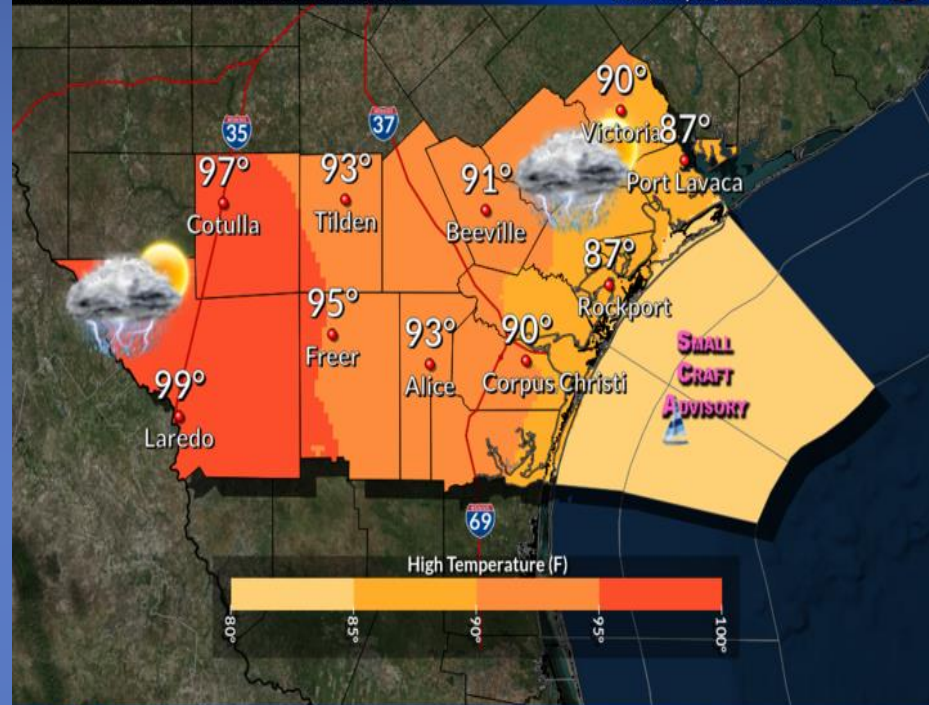

weather.gov/sjt

Severe weather is possible today across West Central Texas. The highest threat is across the area north of a Mason to Barnhart line. The severe weather threats include large hail, isolated tornadoes, and strong, damaging winds. Deadly lightning is also possible. Heavy rainfall may bring a threat for localized flash flooding.

Warm Again Today

Isolated Showers and Thunderstorms Possible

Weather Forecast Office
Corpus Christi, TX
Issued May 29, 2019 5:03 AM CDT

f t y NWSCorpus

weather.gov/crp

Warm to hot today with isolated showers and thunderstorms. A moderate to strong onshore flow will persist over the Gulf waters and over the bays south of Port Aransas today. A Small Craft Advisory is in effect for the southern bay waters, and for the Coastal Waters today.

Hazardous Weather

Today's Strong to Severe Storms

Approximate time frame for Strong to Severe Storms

Weather Forecast Office
Fort Worth, TX

Issued May 29, 2019 7:05 AM CT

This Morning

- Strong to near severe storms (gusty winds and small hail) are expected to enter the Big Country & western North Texas.
- Isolated storms expected.

Late Morning to Mid Afternoon

- Severe weather risk increases with a threat for large hail, strong to damaging winds and a tornado or two.
- Strong to severe storms possible with risk for large hail.

Mid Afternoon to Evening

- Severe weather risk shifts east with large hail, strong/damaging winds and a tornado or two.
- Strong to severe storms possible with risk for large hail.

Heavy rain may lead to Flash Flooding through today...especially north of the I-20 corridor

NWSFortWorth

weather.gov/fortworth

Thunderstorms are expected to be ongoing during the morning hours today mainly to the northwest and will increase in coverage along a cold front through midday. By this afternoon, severe thunderstorms are expected along a cold front which will move across all of North and Central Texas.

Hazardous Weather

Severe Thunderstorms Continue

Below-normal temperatures...

Weather Forecast Office
Midland/Odessa, TX

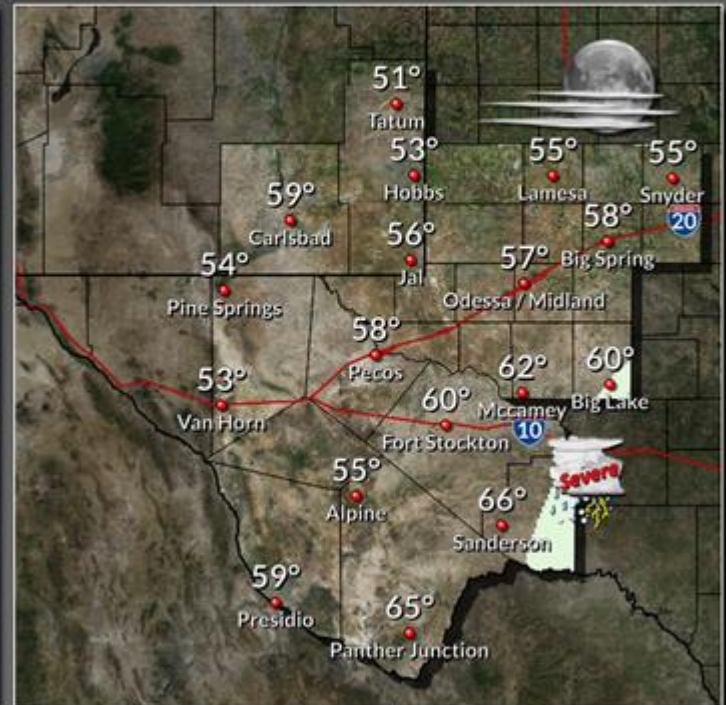

Issued May 29, 2019 2:10 AM CT

Today

Tonight

NWSMidland

weather.gov/maf

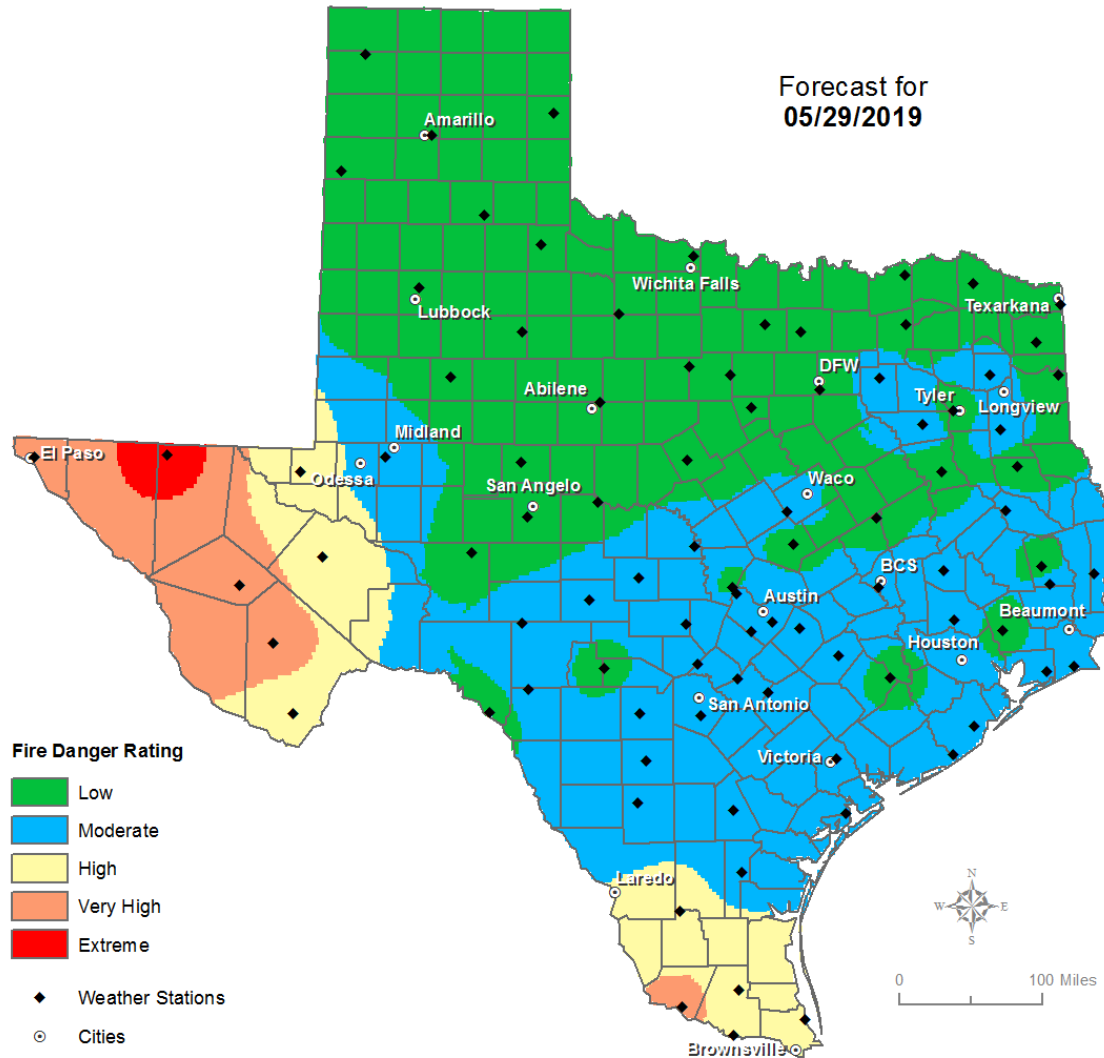

Thunderstorms will be possible today and tonight. Any storms that do develop will be accompanied by frequent lightning, small hail, gusty winds, and brief, heavy rainfall. There is a slight risk of severe storms, capable of producing large hail, damaging winds, and an isolated tornado. Otherwise, below-normal temperatures are expected.
